SENIOR PRODUCT ENGINEER, THEBLAZE.COM (REMOTE) 2014 - CURRENT

I work remotely writing code for TheBlaze.com, a news company that receives millions of unique viewers every month. My responsibilities include developing applications, tools, and features for use by employees and users, reviewing pull requests, product lifecycle management, communication with product stakeholders, and helping debug when issues arise. Some of the projects I have worked on over the years include a custom AJAX commenting system, comment moderation systems, login and authentication systems, site-wide advertising takeover systems, data reporting systems, custom APIs, and a user-facing self-publishing system.

DEVELOPER, ZNGINE.COM (LAS COLINAS, TX) 2013

I worked as a contractor for the social media music startup, Zngine.com. As a part of the seven-member team, I wrote code for the backend and the frontend tying together the data and the display. Some of the systems I worked on included the profile, comments, and scheduling. The project made it to an Alpha testing release before I moved on to my next adventure.

FOUNDER/OWNER, ARROW DESIGN GROUP (SALISBURY, MD) 2004-2013

I started the company to fill a void in the market. We were consistently praised for showing up to get the job done and surpassing our client's expectations. I designed solutions that fulfilled customer's needs and wants with interior and exterior designs, custom blue prints, and prepared material estimates. I was able to build relationships with clients and suppliers that led to repeat business over the years. I also estimated quotes for jobs large and small, supervised projects, employees and sub-contractors, and managed the company books.

<technical> skills

USE REGULARLY

- Mac OS / iOS
- PHP / WordPress
- MySQL / Sequel Pro
- JavaScript / jQuery
- APIs / AJAX / JSON
- HTML5 / CSS3
- Yii 2
- Ruby on Rails
- MAMP / LAMP
- Version control (Git)
- Slack / HipChat
- Jira / Trello
- Handlebars
- Grunt

HAVE EXPERIENCE

- SCSS / LESS
- Backbone
- Node JS
- MongoDB
- Google Analytics
- Windows
